

Waste

- A twice weekly (Monday and Thursday) service of rubbish collection is provided through a private contractor. In the UB car park, two types of bins are supplied for resident's use - **Commingle** (yellow sign) and **General Waste** (red sign). Red-labeled bins are for household rubbish, the Yellow-labeled ones for recyclable waste.

Some principles that will assist the environment, the recycling process and reducing costs to owners are ...

- Put waste only in the bins provided, taking care not to over-fill them so as to allow waste to spill onto the common area floors.
- Crush or flatten all cartons/boxes to save bin space and collection costs.
- To assist in the recycling process, recyclables are to be tipped loose into the Commingle bin, **NOT** left in plastic bags used to carry the items from your apartment.
- Don't over-load any bin with large or heavy materials such that it becomes a health and safety risk for anyone moving it up to the street for collection. It may also damage the bin.
- Bins are provided for domestic waste only. Trade waste from work done in apartments is to be removed by the contractor - not placed in bins. Please make this requirement known to your contractors.
- Disposing of garden waste, furniture or other non household items is **not** an OC responsibility. Please contact City of Yarra for this to be collected.
- If you employ a cleaner, please ensure they also follow these principles.
